PROFILE

Erik is a business information systems specialist with more than ten years in IT and web development. He combines React and TypeScript with product architecture and project management - and with his experience as a founder and managing director. Background: Business informatics and company leadership.

EXPERIENCE

Since 2015

Founder and Managing Director

[Kadelo GmbH, Düsseldorf](#)

Founded and managed an online marketing agency with eight employees, focused on WordPress, SEO and Amazon SEO; divisional sale to the Seeders Group. Responsibilities: management, project management, client support, team leadership, web development (focus: WordPress), SEO, Google Ads, Amazon SEO and ads.

2020-2021

Founding and strategic management

[Seeders GmbH](#)

Founded Seeders GmbH as an international SEO agency in a joint venture with the Seeders Group; after rapid growth, sold it to the Seeders Group. Responsibilities: investor, strategic management, recruiting.

2011-2015

Working student, software development

[adesso](#)

Web development with HTML, CSS, JavaScript, jQuery, FirstSpirit and Java.

EDUCATION

2022-2026

Master's Programme in Business Informatics

[IU International University of Applied Sciences](#)

Master's thesis: Potentials and limitations of generative AI as a decision-support system in real estate valuation - a comparative mixed-methods analysis based on real-world property listings.

2015

Semester abroad

[California State University, East Bay](#)

Marketing management, international business law, global supply chain management.

2010-2014

Bachelor of Science, Business Informatics

[University of Duisburg-Essen](#)

Thesis: End-user programming for knowledge workers.
