FOCUS

- AI-assisted software development
- React and TypeScript
- Modern web applications
- Testing and software quality
- Digital solutions for buildings and energy

TECHNOLOGIES

AI
AI-assisted development

FRONTEND & WEB
TypeScript | JavaScript | React |
Next.js | Node.js | Tailwind CSS |
Storybook | Chart.js

QUALITY & WORKFLOW
Cypress | GitLab | Figma

INTERESTS

Running | Board games | Skiing |
Hiking | Reading manga | Drawing

PROFILE

Heike uses AI-assisted workflows to build modern web applications with React and TypeScript. She combines productive AI use with testing and high software quality, shaped by the structured view of complex systems she brings from architecture. Background: Architecture, buildings and energy efficiency.

PROJECTS

Since May
2023

PROJECT 01

Freelance Software Developer

[Meetago](#)

Ongoing development of a digital platform for planning and booking meetings and events. Implementation and maintenance of modern frontend features with React and TypeScript, development of reusable components, and close collaboration with design and backend teams. Focus on intuitive user journeys, responsive interfaces, and reliable software quality through testing and structured reviews.

Since 2022

PROJECT 02

Relaunch and further development of Javlis.com

[TopieT GmbH](#)

Frontend development for a decentralized finance portal. Technologies: React, TypeScript, Next.js, Tailwind CSS, Cypress and Chart.js.

EDUCATION

2022

Coding bootcamp, Full-Stack Software Engineering

[Mimo](#)

2014-2018

Master of Science, Architecture

[TU Dortmund University](#)

Master's thesis at the Chair of Building Physics and Building Services on vacuum insulation in building construction.

2015

Semester abroad, design and applied arts

[California State University, East Bay](#)

2010-2013

Bachelor of Science, Architecture

[University of Wuppertal](#)
